broksonic vcr user manual

The VCR uses a remote control. It can be connected to your home cable system, allowing you to record a program. You can even set a timer to record a show while you are not home. Step 1 Plug the power cord from the back of the VCR into an open AC outlet in your home. Connect a coaxial cable from a cable outlet in your home to the input on the rear of the VCR. Also, you can enter the channel number with the keypad on the remote. Use the up, down, left and right buttons to move between the date and time and the up and down buttons to change the values. Step 4 Insert a VHS tape into the tape deck. Insert a blank VHS tape into the VCR to record a program. Here you can choose a date and time to set up a recording. Leave a blank tape in the VCR and leave the device on and tuned to the channel you want to record before you leave. If the device is not responding check the batteries in the remote it may be that batteries are exhausted. Use the remote controls mode buttons to set the remote to the correct mode for the equipment. Be sure to program the remote control to operate the other equipment as described on manual. To change the mode, press the button for the equipment you want to control. The mode button lights for three seconds to show youve set the remote to that mode. Depending on how the remote is set up, the remote control may use UHF radio signals, IR signals, or both to control the receiver. However, only IR signals are used to control other equipment. IR signals travel short distances generally 20 feet or 7 meters they can go up to 40 feet, and cannot go through walls or other solid objects. Point the remote control directly at the equipment you want to control, with no objects to block the signal path. This manual shows you how to program the remote control to operate a TV. The following section uses a different method to program the remote control to operate a TV or other equipment such as a DVD player or VCR, tuner, amplifier, audio receiver or a second TV. You can program the remote control by either following the instructions in Programming Using Equipment Remote Code Tables, or the Scanning for Equipment Codes procedure. Put the remote in TV mode to use TV functions, or DVD mode to use the DVD player or VCR functions. Can u please help Thanks, Mike Please thank Stu for scanning this. I have. the unit, it must be through a setup menu via the remote control.<http://epsilon-imaging.com/first-alert-smoke-detector-user-manual.xml>

If you have the remote it shouldn't be too much trouble to experiment with the options until you find the right menu. If you didn't get the remote along with the unit, you are probably going to have to live with whatever channel it's on already. I have uploaded the manual to my personal web page. Amazon Customer 1.0 out of 5 stars It was all scratched in the front and had dirt and nasty stuff on it that i had to clean off. Took it to a friend at Staples, he took it apart, and the dust was the worse i have ever seen, even living in the middle dust bowl in Texas. It did not come with the cable components, nor a remote.

Will never buy from this seller ever again, and will make sure my friends don't either. Doesn't even deserve the one star. I wanted to use this item in my bedroom. I hooked it up all vhs tapes play good only the dvds would not play. I kept getting told check my dvd but all of my dvds are new they have on scratches and are in excellent good condition. That's why I'm sending this item back. I hope you

understand my point of view. Thank you edward covarrubias. Pretty banged up looking. I already had a vcr combo that looks nicer, but didnt want to get a universal remote, as they dont usually work as well. Works and the view of my vidoes and dvds is perfect. Something went wrong.
