Our library is the biggest of these that have literally hundreds of thousands of different products represented.

## Book Descriptions:

# canon ixus 500 user manual

If anything is missing, contact your camera dealer. Please note that Canon Inc., its subsidiaries and affiliates, and its distributors are not liable for any consequential damages arising from any malfunction of a camera or accessory, including memory cards, that results in the failure of an image to be recorded or to be recorded in a way that is machine readable. The electromagnetic waves emitted by the camera may interfere with the operation of electronic instruments and other devices. Exercise adequate caution when using the camera in places where use of electronic devices is restricted, such as inside airplanes and medical facilities. This is due to the high intensity of the flash burning dust and foreign materials stuck to the front of the unit. Please use a cotton swab to remove dirt, dust or other foreign matter from the flash to prevent heat buildup and damage to the unit. Attaching the Strap Thread the end of the strap through the strap hole , and then pull the other end of the strap through the loop on the threaded end Holding the Camera Place the strap around your wrist. Be sure to charge the battery initially, because the camera is not sold with the battery charged. Remove the cover. Insert the battery. After aligning the marks on the battery and charger, insert the battery by pushing it in and down . Note that before using a new memory card or a memory card formatted in another device, you should format the memory card with this camera p. 166. Open the cover. Slide the cover and open it Insert the memory card. The memory card will pop up. Setting the Date and Time A screen for setting the date and time is displayed the first time you turn the camera on. Press the qr buttons to choose your local time zone. Finish the setup process. Press the m button when finished. After a confirmation message, the setting screen is no longer displayed. Access the camera menu. Enter Playback mode. Press the 1 button. Access the setting screen. <http://agendatourvietnam.com/hinhanh/indesit-electric-oven-manual.xml>

- **canon ixus 500 hs digital camera user manual, canon ixus 500 user manual, canon ixus 500 user manual pdf, canon ixus 500 user manual download, canon ixus 500 user manual free, canon ixus 500 user manual 2017.**

Press and hold the m button, and then immediately press the n button. Set the display language. Press the opqr buttons to choose a language, and then press the m button. Shooting Smart Auto For fully automatic selection of the optimal settings for specific scenes, simply let the camera determine the subject and shooting conditions. Turn the camera on. Shooting Still Images Focus. Press the shutter button lightly, halfway down. The camera beeps twice after focusing, and AF frames are displayed to indicate image areas in focus. AF Frames Shoot. Press the shutter button all the way down. As the camera shoots, a shutter sound is played, and in lowlight conditions, the flash fires automatically. Press the movie button. Black bars displayed on the top and bottom Elapsed Time edges of the screen indicate image areas not recorded. Enter Playback mode. Press the 1 button. Your last shot is displayed. Browse through your images. To view the previous image, press the q button. Press the m button, press the op buttons, and then press the m button to choose again. Playback now begins, and after the movie is finished, is displayed. To adjust the volume, press the op buttons during playback. In such cases, it will either be included on the CDROM bundled with your camera, or you can download the latest version from the Canon website. Using the software auto update function, you can update to the latest version and download new functions via the Internet some software excluded, so be sure to install the software on a computer with an Internet connection. For details about USB connections on the computer, refer to the computer user manual. Install the files. Turn the camera on, and follow the onscreen instructions to complete the installation process. In the screen that displays, click the link to modify the program. Double click.

Changing the aspect ratio see p. To turn the camera off, press the 1 button again. [http://comfortinnandsuitesbarrie.com/phpsites/vertical\\_living/uploads/indesit-fm7-manual.xml](http://comfortinnandsuitesbarrie.com/phpsites/vertical_living/uploads/indesit-fm7-manual.xml)

Once the subject is in focus, press the button all the way down to shoot. In this manual, shutter button operations are described as pressing the button halfway or all the way down. Menu items are grouped by purpose on tabs, such as shooting 4, playback 1, and so on. The startup screen is displayed. Enter A mode. Shooting Still Images Focus. Press the shutter button halfway. Several AF frames are displayed when multiple areas are in focus. AF Frames Shoot. Press the movie button. Elapsed Time Black bars displayed on the top and bottom edges of the screen indicate image areas not recorded. Blocking the microphone may prevent audio from being recorded or may cause the recording to sound muffled. Depending on the scene, continuous images may be shot p. 52. Background Normal Backlit. Move the zoom lever toward i. Hold the lever until zooming stops. The camera will shoot about 10 seconds after you press the shutter button. Configure the setting. If the camera is unsteady while you are pressing the shutter button, it will not affect your shot. Configure the setting. More time is required between shots when the flash fires or when you have specified to take many shots. Shooting will stop automatically when the memory card becomes full. However, note that these cannot be removed. Confirm beforehand that the date and time are correct p. 17. Configure the setting. Specify Tracking AF. Press the o button. is displayed in the center of the screen. Choose a subject to focus on. Aim the camera so that is on the desired subject, and then press the shutter button. In A mode, the camera can detect babies and children based on registered birthdays and optimize settings for them when shooting. Register face information. Aim the camera so that the face of the person you want to register is inside the gray frame at the center of the screen. A white frame on the person's face indicates that the face is recognized. Enter a name. Press the m button.

Press the opqr buttons to choose a character, and then press the m button to enter it. Up to 10 characters can be used. In addition to a head on angle, add a slight side angle, a shot when smiling, and shots inside and outside. Registering face info right before shooting will allow for easier detection of registered faces. Press the opqr buttons to choose the name of a person to overwrite, and then press the m button. If 4 or less face information slots are registered, follow step 5 on p. 67 to add more face info. Choose the name of the person whose face info you want to erase. Press the opqr buttons to choose the name of the person whose face info you want to erase, and then press the m button. However, names recorded in previously shot images will not be erased. Configure the setting. Press the m button, choose in the menu, and choose the desired option p. 41. Once the setting is complete, the screen aspect ratio will be updated. For guidelines on how many shots at each resolution setting can fit on a memory card, see "Specifications" p. 33. Configure the setting. Press the m button, choose in the menu, and choose the desired option p. This greenish tinge can be corrected automatically when shooting, using Multiarea White Balance. For guidelines on the maximum movie length at each level of image quality that will fit on a memory card, see "Specifications" p. 33. Configure the setting. Press the m button, choose in the menu, and choose the desired option p. However, the recording may sound unnatural when this option is used when there is no wind. Configure the setting. Configure the setting. Configure the setting. Choose Press the m button, choose in the menu, and choose Configure the setting. For instructions on menu functions, see "n Menu" p. 42. Deactivating the AF Assist Beam You can deactivate the lamp that normally lights up to help you focus when you press the shutter button halfway in lowlight conditions. Configure the setting. Enter 4 mode.

Set the mode switch to 4. Choose a shooting mode. Press the m button, choose G in the menu, and then choose a shooting mode p. Still Images Movies S Shoot under water Underwater Natural colored shots of sea life and underwater scenery, when you use an optional waterproof case p. Still Images Movies Correcting White Balance White balance can be manually corrected in S mode

p. Choose a shooting mode. Press the p button, press the qr buttons to choose an effect level, and then press the m button. You can also make movies that look like scenes in miniature models by choosing the playback speed before the movie is recorded. Be sure to set the zoom before shooting. Still Images Shooting With a Soft Focus Effect This function allows you to shoot images as if a soft focus filter is attached to the camera. Press the p button, press the qr buttons to choose a color tone, and then press the m button. Press the p button. Position the center frame over the new color, and then press the r button. The specified color is recorded. Specify the range of colors to replace. Press the op buttons to adjust the range. To replace only your specified color, choose a large negative value. Before each shot, the camera will automatically record a movie clip of the scene. The camera will shoot about two seconds after a wink is detected. Note that sound is not recorded. Press the m button, choose in the menu, and choose the desired frame rate p. You can quickly edit, save, and manage iFrame movies using the included software. Press the m button, choose in the menu, and choose the desired option p. 41. The option you configured is now displayed. For typical shooting conditions, including backlit shots. Press the m button, choose in the menu, and choose the desired option p. 41. The option you configured is now displayed. Set the white balance under the same light source that will illuminate your shot. Follow the steps in "Adjusting White Balance".

Press the m button, choose in the menu, and choose the desired option p. 41. The option you configured is now displayed. Follow the steps in "Changing Image Color Tones My Colors". Continuous shooting and focusing. Continuous shooting, with the focus fixed at the position Continuous determined in AF lock. You can recompose shots as needed before shooting. This feature is called Focus Lock. Focus. In this case, the focus and exposure are set according to the specified AF frame mode. After you lock the focus, the focal position will not change even when you release your finger from the shutter button. Lock the focus. With the shutter button pressed halfway, press the q button. For details on the flash range, see "Flash Range" see "Specifications" p. 33. Press the r button, press the qr buttons to choose h, and then press the m button. Once the setting is complete, h is displayed. Set the flash to h p. 123. Lock the flash exposure. Aim the camera at the subject to shoot with the exposure locked. For guidelines on how many shots at each compression ratio can fit on a memory card, see "Specifications" p. 33. Configure the setting. Movies Deactivating Powered IS Powered IS reduces slow camera shake that may occur when recording telephoto movies. Enter Playback mode. To view the previous image, press the q button. To start playback, press the m button, press the op buttons to choose, and then press the m button again. Adjust the volume. Press the op buttons to adjust the volume. Pause playback. To pause playback, press the m button. The movie control panel is displayed. For details on the information displayed, see p. 204. No information is Simple Detailed Enables you to displayed Information Information. Access Focus Check. Press the p button p. 130. A white frame is displayed where the AF frame was when the focus was set. Display images in an index. Move the zoom lever toward g to display images in an index.

Press the m button, choose in the menu, and choose a condition p. 41. View the image search results. Choose the type of images to view by pressing the opqr buttons, and then press the m button. Choose a movie. Press the m button, choose in the menu, and choose the date p. 41. Play the movie. Press the m button to start playback. Pressing the qr buttons will display only images in the group. Follow the procedure on p. 128 to choose an image, and then press the m button. An orange frame is displayed around the selected face. When multiple names are displayed in an image, press the qr buttons to choose the name to change, and press the m button. Moving the zoom lever toward k will zoom in and magnify the image, and displayed. You can magnify images up to about 10x by continuing to hold the zoom lever. To zoom out, move the zoom lever toward g. Each image is displayed for about three seconds. Choose a slideshow transition and start playback. Press the m button, choose. Choose from six transition effects between images. Access the setting screen. After
